

Spring April 2016

*It's Official! Spring is here
What we've been waiting for;
Days of blue skies and sunshine
Right outside our front door.*

*We need rain as well as sunshine
To get plants and seeds to grow;
Frost is sent to kill some buds
Stopping fruit trees overflow.*

*Birds singing the dawn chorus
Bees venture out from the hive,
Buds are bursting all around
It feels good to be alive.*

*Summer heat ripens the berries
Drying root crops for winter store;
Just a few examples here
Think about it you'll find more.*

*Throwing off the winter gloom
As daylight hours increase;
You get a surge of energy
And troubles seem to cease.*

*No human hand is able
To do what must be done;
To keep things working smoothly
Here on earth for everyone.*

*We take so much for granted
Seasons change without a thought;
Do we appreciate this timely gift
As gratefully as we ought?*

*We need this power to guide us
Even on hard paths it would seem;
Let us be forever grateful
For the laws that are supreme.*
