

The hot summer and lack of rain has made farming difficult this year!

Farming Matters

Climate changes in the last ten years have made farming more difficult!

Farming is so healthy and rewarding,
For as the soil you till;
You are living close to nature,
As you perform our Saviour's will.

Ripening fruit and vegetables,
Grown for us all to eat;
The grass for sheep and cattle,
A source of milk and meat.

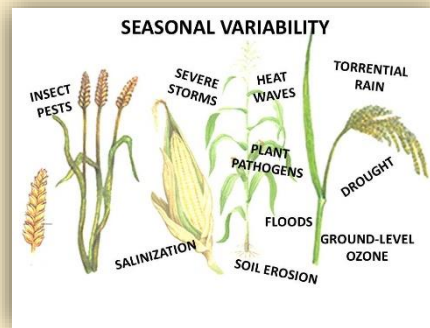

We've been put upon this planet,
To cultivate the land;
Sowing, tending, harvesting,
Guided by our Maker's hand.

Wool for coats and blankets,
To keep out the winter chill;
If we work with our Provider,
He will all our needs fulfil.

He who guides the growing force,
The sunshine and the rain;
Filling streams with water,
And swelling ears of grain.

Yes! Farming families down the years,
Have been our Earth's mainstay;
So we thank our Lord for the Harvest,
In our heartfelt prayers today.
